

## Action Item for the EPTA Board of Directors

### **Development of EPTA policy for on-road segments**

**Background:** The vision of the Erie to Pittsburgh Trail Alliance is: “A system of non-motorized, multi-use trails, and local connectors...” Experience has shown though, that some segments of the system may have to be temporarily or possibly permanently sharing the road rather than a trail that is off-road. If the EPTA is to permit signage to be placed on these segments and these segments to be placed on the map identifying them as part of the Erie to Pittsburgh Trail and so endorsing the route for trail users, a policy should be developed detailing circumstances and requirements for which the Board will vote in agreement.

**Motion:** A committee of the EPTA Board will research safety and liability concerns and develop an on-road designation policy for any trail segment to be officially endorsed as part of the Erie to Pittsburgh Trail.
