EPT Summit in 2020

The Pennsylvania Statewide Greenways and Trails Summit occur every two years, with the next scheduled for 2019. On the off years, the Pennsylvania Recreation and Parks Program offer funds to offset the cost of more local regional summit/workshop events. Since there are many trail builders, municipal officials, potential corridor owners, etc. that cannot make the larger meeting that are held a distance away, should a one-day workshop/summit be held in area of/or along the Erie to Pittsburgh Trail corridor in 2020 making it most cost-effective for many of the supporters, partners, and potential partners? If so, what could it look like? What concerns are there? Should a committee be appointed?
